SUMMARY

I am an auto diagnostician-electrician, looking for a permanent job in an automobile company. I have extensive experience in the field of repair and maintenance of cars, as well as electric vehicles. I know how to use various diagnostic equipment, I read electrical circuits well.

I also have a hobby closely related to car repair - radio electronics.

I have experience working with electric cars. One of my latest achievements is that in a short period of time, I mastered the repair and maintenance of a Tesla electric car.

Expected salary \$750.
